

Looking for a high-quality Turf Tarp? ABC TARPS will get you covered.

ABC TARPS have had a long association with the agriculture industry supplying durable and quality Polyethylene Tarps throughout Australia for well over 25 years.

The Duratarp Grow Pro Cover is a new product that has been designed here in Australia after extensive dialogue with Curators and the Turf sector. The key motivation for ABC Tarps was to develop a product that is superior in function and performance to what is currently available on the market.

The Duratarp Grow Pro Cover has been designed for the tough Australian environment, it is made from a UV and waterproof protected Polyethylene finely woven tarpaulin product that has been designed to guard newly planted turf from the elements and to enhance and promote growth of existing turf areas

Grow Pro covers are permeable, this allows air, water and light penetration which make it ideal for new seeding and oversowing. This greenhouse effect will warm the soil, resulting in earlier root growth. Accelerates turf growth providing rapid germination. It's environmentally friendly, utilising less water and chemicals. Although lightweight, it will protect whatever you are covering from elements and pests.

All covers are supplied with clear plastic discs and galvanised U shape pegs to secure the cover in place located every 2 meters approximately on the outer perimeter and along the welded joins of the cover..

Our covers are available in a range of sizes as noted below:
- abctarps.com.au/tarpaulins/grow-pro/
